Diabetes Clinic Letter Evaluation Sheet

Section A – Basic Information

Case ID: Case 5

Reviewer: Sharadiya Mitra

Review Date: 09.03.26

Review Timepoint: ☐ Immediate (T0) ☑ Delayed (T1)

Letter Type: ☑ AI-generated ☐ Gold-standard clinician letter

Section B- First Impression

How clear is the clinical message overall?

☑ Very clear
☐ Mostly clear
☐ Somewhat unclear
☐ difficult to understand

Can I Use this letter without editing?

☑ Yes
☐ Minor Edits needed
☐ Significant edits needed
☐ Unsafe without correction

Section C – Clinical Information

Item	Accurate (2)	Partially (1)	Missing/Incorrect (0)	Any Comments
Diabetes type/context	☑	☐	☐	
Complications/comorbidities	☑	☐	☐	
Medication regimen accurate	☑	☐	☐	
Key measurements included	☑	☐	☐	
Glycaemic control described	☑	☐	☐	

Subtotal (max 10): 10

Section C – Must-Not-Miss Safety Items

Safety Item	✓ Correct	⚠ Partial	✕ Missing
Item 1 Recent hypoglycaemia	☑	☐	☐
Item 2 Recent infection	☑	☐	☐
Item 3 Tacrolimus dose decreased	☑	☐	☐
Item 4	☐	☐	☐
Item 5	☐	☐	☐
Item 6	☐	☐	☐
Item 7	☐	☐	☐

Number of Safety Omission: Nil

Section D – Clinical Intent Preservation

What do I believe the clinician's priorities were?

Recent infection with an episode of recent severe hypoglycaemia hence tacrolimus dose decreased. Risk of hypoglycaemia due to recent infection.

To be compared later with hidden clinician intent

Score: ☑ Fully preserved (2) ☐ Partially preserved (1) ☐ Misinterpreted/absent (0)

Intent Score: 2/2

Section E – Clinical Action Interpretation

Based ONLY on this letter, what actions would I take as GP?

Prograf dose reduction noted

Does this match intend management: ☑ Yes- Same actions (2) ☐ Minor differences (1) ☐ Different management (0)

Concordance Score: 2/2

Section F – Error Classification

Omission Errors: ☐ Important information missing

Commission Errors: ☐ Incorrect information

Hallucination Errors: ☐ Information added not present in source

Interpretation Drift: ☐ Clinical priority changed

☐ Follow up unclear

☐ Responsibility unclear

Section G – Overall Safety Judgement

Clinical risk if letter used without correction:

☑ No safety concern

☐ Low risk

☐ Moderate risk

☐ Potentially serious risk

Justification:

_____

_____
